Re: *Ex Parte* Notice: *Terrestrial Use of the 2473-2495 MHz Band for Low-Power Mobile Broadband Networks* – IB Docket No. 13-213

Dear Ms. Dortch:

On August 12, 2016, Tim Taylor, Vice President of Finance, Business Operations & Strategy, for Globalstar, Inc. (“Globalstar”), John Dooley of Jarvinian, and I spoke by phone with Erin McGrath, Legal Advisor to Commissioner Michael O’Rielly, regarding the Commission’s proposed rules in the above-captioned proceeding.<sup>1</sup> Globalstar’s representatives described the manner in which Terrestrial Low Power Service (“TLPS”) would be deployed if authorized by the Commission. TLPS is an innovative broadband service that would serve the public interest by adding 22 megahertz to the nation’s broadband spectrum inventory and alleviating congestion in the 2.4 GHz ISM band. We also discussed a potential framework to permit third parties to obtain opportunistic use of Channel 14 where Globalstar has not deployed TLPS, while ensuring that licensed and unlicensed services are not disrupted.

Pursuant to section 1.1206(b)(2) of the Commission’s rules, 47 C.F.R. § 1.1206(b)(2), this *ex parte* notification is being filed electronically for inclusion in the public record of the above-referenced proceeding.

Respectfully submitted,

/s/ Regina M. Keeney  
Regina M. Keeney

cc: Erin McGrath
